

CAN'T AFFORD TO REDUCE PRODUCTION SPEEDS JUST TO LABEL?

HAVE A SUPER-HIGH SPEED AND DEMANDING APPLICATION?

NEED THE FASTEST DISPENSE SPEED IN THE INDUSTRY?

VITOF

The VITOF PDFM

pressure sensitive labeler is your solution!

PDFM DESIGN PHILOSOPHY

Fast

Highest dispense speeds in the industry

Accurate

Automatic label recognition, advanced web tension control and speed following

Simple Set-up

Intuitive, operator friendly controls
QuickSet and Auto Set features maximize uptime

Tough

The only Solution for the most demanding high speed, high duty applications

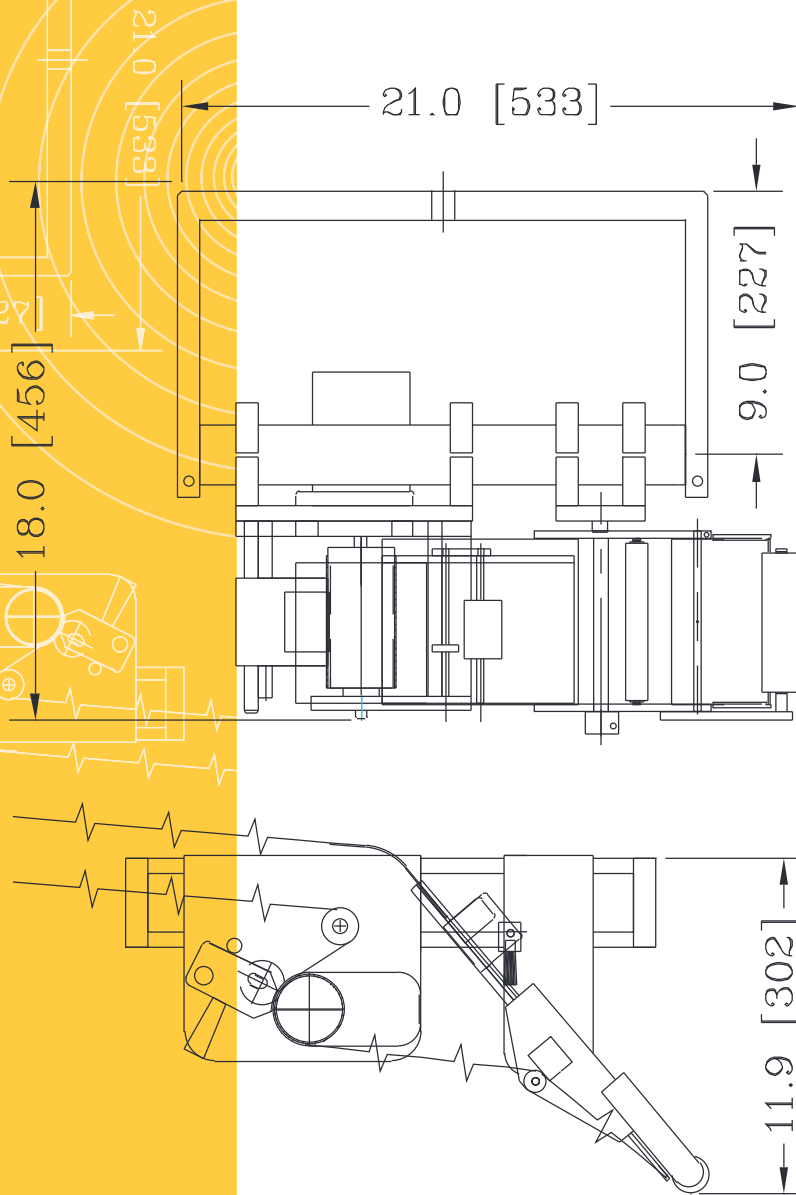

OPERATOR FRIENDLY FEATURES and INTUITIVE CONTROLS

Label at any speed! (There is no need to slow down just to add a label) • Label web speeds in excess of 10,000 IPM • Label accurately through production stoppages and extreme speed changes • Advanced Speed Matching ensures optimum label placement • Automatic Label Recognition algorithm • Automatic label set-up (One button Set-Up!) • Automatic missing label detection and compensation • QuickSet function (No need to scroll through lengthy menus) • Tandem labeling controls with automatic switchover to optional 2nd labeler • Compact modular design (fits into small places) • Remote label supply (located for easy operator access) • Intuitive control panel with 16 push buttons • Easy to understand Message Control Center (4 line x 20 character display) • Detailed messages (Quickly identify set-up and production issues) • Real-time production rate display • On-line product speed display (Meters/minute or inches/minute) • Product and label counters (Including operator reset-able batch counters) • Password protected menu levels (operator, advanced, configurator, service/diagnostics) • Metric & standard unit selection/ conversion (Operators can select the units they prefer) • On-Board Help function (recommends optimum settings to maximize production speed and accuracy)

3.0 [456]

The VITOF PDFM

Reduce Downtime and Set-Up Time

Store and Recall up to 50 production set-ups (easily recall previous production settings) • Automatic Label Recognition algorithm (quick set-up for new production runs) • Automatic label set-up (One button Set-Up!)

- QuickSet function (No need to scroll through lengthy menus) • Eliminate stoppages due to roll changes • Remote Dual unwind and fanfold labels ensure a constant label supply • Vacuum waste removal system eliminate stoppages due to waste removal • Reduce stoppages due to web-brakes caused by splices and perforated liners • VITOF's exclusive Web Tension Control System is gentle on webs

Label in any orientation

Top, Bottom or Side labeling • Ambidextrous (can be converted for Right and Left hand applications with no change parts) • 4" and 7" label width units available
